

Scholarship of Hope

Winner in the Category “Structural Foundation”

Ever since MODUL University Vienna opened its doors sustainability has been one of the fundamental credos for all its stakeholders. One initiative to embrace this principle is the Scholarship of Hope, which is meant to encourage students to promote sustainability by presenting innovative and creative ideas that could be implemented at MU. Parallel to the student scholarship, MU has also initiated an Employee Sustainability Award to recognize MU employees who submit ideas to improve the overall sustainability of the university. Winners of both awards receive attractive prizes and their ideas are published on the university homepage. Moreover, MU is also actively involved in providing students opportunities for extracurricular activities, a commitment which led to the launch of the MU Cares community program. Students and staff are engaged in several external charity initiatives and volunteer work, thereby creating ambassadors of responsible living.
