Mechelen: smart-to-be city

Smart city

From Wikipedia, the free encyclopedia

For the 2006 film, see Smart City (film).

A **smart city** is an urban area that uses different types of electronic data collection sensors to supply information which is used to manage assets and resources efficiently. This includes data collected from citizens, devices, and assets that is processed and analyzed to monitor and manage traffic and transportation systems, power plants, water supply networks, waste management, law enforcement, information systems, schools, libraries, hospitals, and other community services.[1][2][*page needed*] The smart

A depiction of a smart city

Go alone, go fast

Went fast, got lost

‘I know nothing, …’

- Camera’s
  - Analysis of images, for head counts: 2
  - ANPR, licence plate recognition : 70
- WiFi / bluetooth tracking
  - Femtocells (Case: Proximus)
  - WiFi-scanners: 4
- Cell phone tracking
  - Case: Orange
- WiFi & GPS tracking
- Social Media & web analysis
- Project Management tools
- Surveys
- …

Go far, go together - I

- 2015
- Proximus, Belgian mobile operator

- Lead partner: Flemish Art Cities
- Partner: Visit Mechelen

- Interiour solutions

Go far, go together - I

- Learnings
  - Learning process for supplier & client
  - ‘Femtocells’ gave limited insights
    - Impossible to exclude outside passers-by
    - Impossible to exclude inhabitants
    - Technology had to be developed further

Go far, go together - II

- 2017-2018
- Orange: international mobile operator

- Lead partner: City of Mechelen
- Partner: Visit Mechelen

- Cell-phone data

Choosing is winning

- Where do visitors go to?
- How do visitors/crowds move through the city?
- Where do they come from?
- How did they come to Mechelen?

Elke passant wordt geteld binnen een definitie (bv dagtoerist) en binnen de geografische zone van Mechelen. Een passant is uniek in een dag, maar kan in meerdere zones worden opgemerkt. Men moet dus geen zones optellen. Idem voor gemiddelden per dag. Een shopper en inwoner: tot slot, inwoners worden elke dag geteld, dit mag uiteraard niet opgeteld worden in de tijd!
