### TourMIS – www.tourmis.info

# Information and decision support system for tourism managers, media, students, ...

- Provides free and easy access to tourism statistics
- Platform for tourism associations to exchange data/information/knowledge

- Supports the harmonization of tourism statistics
- Tool to learn about the actual usage of tourism market research information (bridging the gap between academia and industry)

#### International data compiled in TourMIS

- Arrivals (annual, monthly data, latest trends)
- Bednights (annual, monthly data, latest trends)
- 60 markets, including domestic visitors
- Capacities (# of hotels, spaces, annual data)
- Average occupancy rate
- Population
- Number of visitors to major attractions
- Eurocity visitor survey
- Last available change rates (ETC data inputters only)
- MICE statistics (CityDNA data inputters only)
- Calculated: Average length of stay, occupancy rate, tourism density and intensity, CO2 emissions, ...

#### November 2022

Since ETC started entering considerably more monthly statistics into TourMIS, a substantial revision of some tables was necessary. In particular, tables M1 and M4 were extended and the overview table X0 was adapted to the new data opportunities. **Relative Figures**

# Research

Insights, research, analysis and benchmarking form a critical part of the capability and the potential of the City Destinations Alliance.

By providing data, cities can benchmark themselves in terms of their economic, environmental, and social performance in tourism. In CityDNA's Research & Insights Knowledge Group, we collect information on important key performance indicators which we analyze and share in forms of regular reports and electronically via the tourism management information system TourMIS.

For the 50% of our members who do not have their own research departments, City Destinations Alliance can provide a unique and essential source of information.

#### August 2023

A new table M30 has been added in countries and cities (monthly data). The table compares the performance of destinations selected by the user. The guest mix share, change from the previous year, and the total are displayed. The table of cities additionally shows a comparison with the country data of all selected cities.

This table was developed based on a request by Magic Cities Germany e.V.

API incoming interfaces for:

- Netherlands <u>https://opendata.cbs.nl</u>
- Norway <u>https://data.ssb.no</u>
- Estonia <u>https://andmed.stat.ee</u>
- Denmark (upcoming soon) <u>https://api.statbank.dk</u>
- Finland (planned until the end of 2023)
- Slovenia (planned until the end of 2023)
- Portugal (eventually)

API outgoing interfaces for:

- VVV Amsterdam
- Wonderful Copenhagen
- Visit Portugal

#### **Current works**

- Adding the size of the geographic area of all tourist destinations included in TourMIS to the database. Calculating density as an additional KPI to existing tables J20, J21 (annual) as well as M20, M21 (monthly).
- Creating a 1-stop city to city search feature to find the most suitable rail connections in the MERITS database
- Developing "Regions" as a new database to TourMIS

- Currently 124 regions are updated monthly
- Austria: 9
- Belgium: 1
- Denmark: 15
- Estonia: 21
- Norway: 78

		The Data Space for Tourism – Tourism Data Inventory and Meetings industry benchmar- king on TourMIS By Jason Stienmetz, Modul University Vienna

#### How to become an active contributor

Before you start entering your figures you need to check the definitions available in TourMIS and the methodologies used for generating your data in your destination!

#### Registration as data inputter

TourMIS has 200 data inputters (140 CityDNA, 60 ETC) authorized persons should ...

- ... have a minimum knowledge of tourism statistics in his/her region (how to get information and how to read and interpret the statistics)
- be registered on TourMIS (for free!)
- be willing to enter statistics on a regular basis

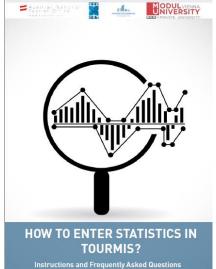

... then send an email to <a href="mailtosupport@tourmis.info">support@tourmis.info</a> and ask for data input authorization for your destination

# Definitions available in TourMIS

A few questions to think about ...

- Hotels or similar vs. collective/paid vs. all forms of accommodation (paid and unpaid/VFR)?
- Bednights or roomnights?
- Does data also include small accommodation units?
- Does capacity data (# of accommodation suppliers, # of bed spaces) cover the same units as the numbers on arrivals and/or bednights?
- For cities only: Does your statistics cover the surrounding region or the "city area"?
- See UNWTO & Eurostat definitions and <u>read Chapter 3 in the TourMIS</u> <u>Manual</u>
