ABOUT MODUL UNIVERSITY

HISTORY

MODUL University Vienna is an international private university in Austria owned by the Vienna Chamber of Commerce and Industry, the largest provider of private education in Austria. The university campus is located on Kahlenberg, a scenic hill with a spectacular view of the capital of Austria.

The MODUL brand stands for more than 100 years of excellence in education. Founded in 1908, MODUL College is the vocational training school with the longest tradition in tourism and hospitality education worldwide. Since 2007, MODUL University Vienna has been offering cutting-edge education (BBA, BSc, MSc, MBA and PhD study programs) in the areas of international management, new media technology, public governance, sustainable development, and tourism and hospitality management.

“The MBA Program of MODUL University Vienna caters to professionals with different educational backgrounds. It offers the possibility to tailor the curriculum to specific interests and sharpens leadership skills by linking proven management methods to innovation and knowledge transfer processes.

The MBA as our flagship leadership program integrates methodological and applied knowledge, with a special focus on management skills and decision making in dynamic market environments. New forms of communication and collaboration and the resulting reconfiguration of corporate workflows exemplify how innovation can trigger significant change within and across organizations.

The modular degree program conveys the wide range of skills required to achieve a competitive advantage in such dynamic market environments. It not only covers general business administration and management knowledge, but also offers a customizable curriculum with extended modules on the economic foundations and management challenges of four high-impact domains: New Media, Public Governance, Sustainable Development, and Tourism. Interactive seminars with leading experts in these domains explore best practice models and the advantages and limits of established and emerging business models.”

Prof. DDr. Arno Scharl
Dean Master of Business Administration Program
Department Head New Media Technology,
MODUL University Vienna

WHY STUDY AT MODUL UNIVERSITY VIENNA

- A 85% international student body provides a multicultural learning environment (students from more than 70 different nationalities have studied at MU)
- All courses are taught in English by an internationally experienced faculty
- Optimal student support ratio of 1:10 (faculty to students)
- All classes are conducted as seminars in a stimulating learning environment that guarantees a high degree of interaction with world-renowned faculty
- Excellent possibilities for networking with over 300 exclusive partner companies
- All programs are accredited by the Austrian Accreditation Council, an independent agency of the Austrian Ministry of Science and Research

e-learning

Working independently with
course material to familiarize
yourself with the subject

Per subject 2-3 consecutive
days of interactive seminars
from 9am – 6pm

Working individually or in
a group
on a final assignment or
project

Thomas Lutz, MBA 2011, Major in New Media and Information Management
Austria
Manager of PR & Public Affairs at Microsoft Austria

“The study field of New Media and Information Management was already near to my current profession and also what I wanted to develop and deepen further in my future career. The **international environment** and English as the course language had a positive training effect not only for my current job but also for further international roles. I had a great **teamwork and learning experience** with other students; we immediately built up learning groups and supported each other.

My studies provided me with a better understanding of the various dependencies between technology and business, impacts and influences, and how to use them for better economic results. The program provided me with a solid academic foundation for many aspects of my current role, while being able to deepen and **use the gained knowledge immediately towards practice**. My perception was that the professional and maturity level of my fellow students was particularly high and I enjoyed the exchange with a lot of bright people.”
