Dear Delegate,

It is our pleasure to welcome you to this two-day event which has been organized jointly by the European Travel Commission (ETC), European Cities Marketing (ECM), and MODUL University Vienna. We believe that the challenging topics selected for these events are crucial issues in the current agenda of most tourism organizations.

The evaluation and monitoring of marketing activities is a vital step in helping tourism managers to develop marketing strategies. Nowadays technology provides valuable support to facilitate the performance of complex analyses and TourMIS, the leading tourism marketing information system in Europe, effectively serves this aim. By attending the workshop on the first day, led by Professor Karl Wöber, founder of TourMIS, participants will learn how to enter tourism statistics into the system and how to use the various benchmarking tools to produce valuable market research reports.

The International Seminar on Digitalization and Innovation in Tourism on day 2 is jointly organized by ETC and ECM. In the last decades advances in technology have contributed significantly to make travel more efficient, affordable and reachable to travelers from all around the world. These developments have re-shaped the tourism sector as it is known and will continue to do so at a hastening pace bringing along opportunities and challenges for tourism businesses and tourism destinations from all around the world. Success will ultimately depend on those destinations that adopt a proactive approach and that are eager to embrace the digital transformation in a fast-changing and dynamic environment. The key objective of this event is to discuss and provide insights into advances in terms of digitalization and innovation that are shaping the future of travel and the tourism industry. Some of the items addressed will revolve around (i) Short-medium trends in digitalization and their potential impact on the travel and tourism sector, (ii) Implications of this transformation for the tourism sector in Europe (iii) Different approaches to leverage big data analytics, blockchain technology, virtual reality (VR), augmented reality (AR) or voice and artificial intelligence and translate the information into travel intelligence and (iv) Best-practices and deliver insights on how national and city DMOs leverage digital innovation to drive growth and to meet the expectations of tomorrow's consumers.

Both days have been planned to encourage the active participation of delegates in the program. We are looking forward to meeting you for a motivating and challenging few days in Vienna!

MEETING VENUE

Austria is located in the heart of Europe. The capital, Vienna, enjoys a moderate and mild climate with summer temperatures ranging from 20 to 30°C. Vienna is an economically, politically, and culturally important metropolis with a unique charm and vibrancy. The place combines an international atmosphere with the traditional flair of its coffeehouses. It offers classical music and modern art, historic buildings and outstanding shopping opportunities, making it one of the cities with the highest quality of life.

For more information, visit the website of the Vienna Tourist Board:

<http://www.wien.info/en>

The venue for the events is MODUL University Vienna (MU Vienna), which is located on top of Kahlenberg offering a marvelous view over the city. The seminar rooms at MU Vienna are equipped with IT facilities and free wireless Internet connection.

Since 2007, MU Vienna has been offering cutting-edge education (BBA, BSc, MSc, MBA, and PhD study programs) in the areas of international management, new media technology, public governance, sustainable development, and tourism and hospitality management.

MU Vienna offers a community-oriented atmosphere. Its student population represents over 70 countries, thus, offering a truly multicultural, international study environment. All study

programs are conducted entirely in English. Environmental and social sustainability is a key principle of MU Vienna and is not only reflected in the university's academic activities but also in the daily work flow. The choice of an environmentally-friendly venue as MU Vienna contributes to green the events.
